¹ Please note this list is subject to change.

² Always refer to your benefit plan materials to determine your coverage for medications and cost share. Some medications listed on the PDL may not be covered under your specific benefit. Where differences are noted, the benefit plan documents will govern.

Health Care Reform: Pharmacy Benefit Preventive Care Medications Coverage

Frequently Asked Questions

Under the health reform law, health plans must cover U.S. Preventive Services Task Force A & B Recommendation OTC medications and FDA-approved prescription and Over-The-Counter (OTC) contraceptives for women at 100 percent without charging a copayment, coinsurance or deductible when:

- ▶ Prescribed by a health care professional
- ▶ Age- and gender-appropriate
- ▶ Filled at a network pharmacy

To comply with this new law which was clarified further by the U.S. Dept. of Labor on February 20, 2013, we are offering this updated list of no-cost Preventive Care Medications.

When did the new law take effect?

- ▶ The list of **prescription contraceptives** became available at \$0 cost-share upon your plan's last renewal date after August 1, 2012. For most plans, this was January 1, 2013. For some plans, the coverage took effect later in 2013. If you have questions, ask your HR representative for the start date of your coverage, or refer to your plan documents for your specific coverage.
- ▶ The list of **U.S. Preventive Services Task Force A&B Recommendation OTC medications** and **OTC contraceptives** on this Preventive Care Medications list will be available for \$0 cost-share at network pharmacies beginning November 1, 2013 for most plans.

Please note, in order to obtain coverage, these medications and supplements also require a prescription from a health care professional and must be age-and gender-appropriate.

Which Preventive Care Medications are available at no cost?

A list of Preventive Care Medications can be found on page 1 and 2 of this document so you can discuss them with your doctor. You can also login to www.uhcsr.com or call the number on your health ID card to confirm the most current list of Preventive Care Medications for your plan.

Will this drug list change?

Drug lists can and do change, so it's always good to check. You can learn the cost of all products and no cost options by:

- ▶ Logging in to www.uhcsr.com, and log in "To My Account"
- ▶ Calling the number on the back of your health ID card.

Are all birth control products going to be available at no cost to me?

No, only the products on the list applicable to your plan will be no cost under the pharmacy benefit. The health reform law allows plans to use reasonable medical management to decide which contraceptive products will be provided at no cost-share.

If you choose a no cost product from the list applicable to your plan, your cost at the pharmacy will be \$0. If you choose a covered birth control product that is not on the list, a copay or co-insurance may be required. And this cost will apply to your deductible if you have one.

What if I have a high-deductible or consumer-driven health (CDH) plan?

The same no cost options on the list applicable to your plan will be available to you if you are in one of these plans. If you fill a prescription for covered birth control products not on your plan's no cost drug list, you will need to pay the full cost, until your pharmacy plan deductible is reached.

Are the no cost Preventive Care Medications available at both retail and mail pharmacies?

Prescription contraceptives will continue to be available at both network retail pharmacies and the mail order pharmacy for plans with a mail order benefit.

U.S. Preventive Services Task Force A & B Recommendation OTC medications and OTC contraceptives will be available at network retail pharmacies beginning November 1, 2013 and at the mail order pharmacy beginning January 1, 2013.

What if the health care reform law requirements for Preventive Care Medication coverage change?

If the law requiring plans to provide Preventive Care Medications at no cost changes, information on how your costs may be impacted will be available to you by:

- ▶ Logging in to **www.uhcsr.com**, and log in “To My Account”
- ▶ Calling the number on the back of your health ID card.

What if my plan has a religious exemption for covering contraceptives?

Some plans may not have coverage for contraceptives if your school or university qualifies for a religious exemption. However, you will still have coverage without cost-share of the U.S. Preventive Services Task Force A & B Recommendation OTC medications listed on the Preventive Care Medications list (such as aspirin and Vitamin D).

Still have questions?

Login to **www.uhcsr.com** and log in “To My Account” or call the number on the back of your health ID card.
